Motor Vehicle

cable assemblies - wiring harnesses

Wiring Harness

The increasing use of electrical systems in a modern motor vehicle has put the wiring harnesses in a position of paramount importance. Nowadays there are wiring harnesses for engines, chassis, braking-, and steering systems. We are a global manufacturer of motor vehicle wiring harnesses.

Custom Design

BizLink specializes in custom design of motor vehicle wiring harnesses. Currently we are working with major manufacturers of ATVs and Snowmobiles for which we manufacture custom-design harnesses for engines and chassis. Our capabilities for conventional cars include internal wiring harnesses for doors, seats, dashboards, lighting system, external lighting system and vehicle telematics. In addition to our focus on motor vehicles, we also do harnesses for air-conditioning units in trailers, trucks and containers.

Design Process

We can manufacture harnesses perfectly complying to your specification, or be a part of your product development and help you through your design process. After working with custom design in a number of different industries, we know by experience the importance of close dialog with our clients. Our expertise, combined with yours, we will find and deliver the best solutions to you.

Quality

We maintain in-house Q&A labs at our main manufacturing facilities which have all the equipment and expertise to perform all mechanical, electrical and environmental tests on all materials and components

right on the factory floor. In our assembly line, every harness is handled with the utmost care in order to achieve the highest possible quality. As required by the motor vehicle industry, we are TSI 6949 and QS9000 certified.

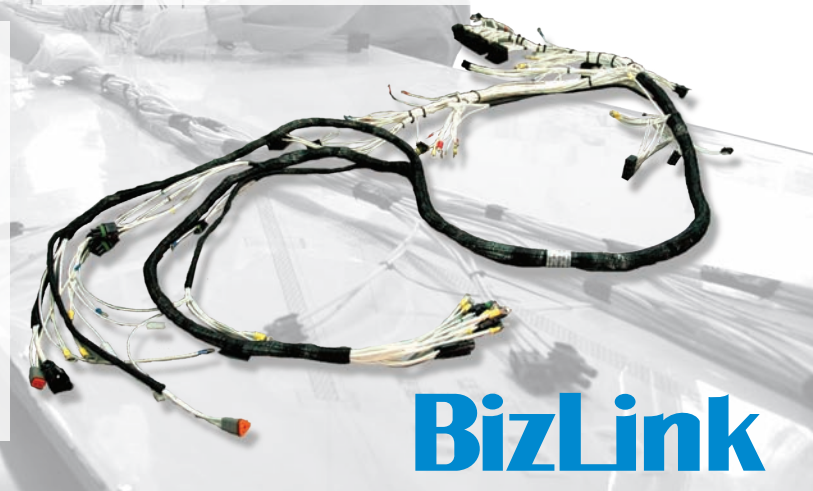

Company Profile

BizLink is a global manufacturer of cable assemblies, wiring harnesses and optical components. With factories in China, Malaysia and Mexico, and with sales and engineering support in US, Ireland, Japan

and Taiwan, we can not only give you all the benefits as an Asian manufacturer, but also serve you as a local manufacturer. We have RoHS infrastructure in our factories and are ISO9001, ISO14001, ISO13485, TSI 6949 (QS9000), UL and CSA certified as well.
